

FSC-Certified GreenWood Tree Farm

FSC Pure Certified Collins Pacific Albus Plantation Hardwood Grown in the Northwest!

- Collins Upper Columbia Mill produces 100 MMBF of lumber per year, providing consistency, uniformity, and volume you can depend on year round.
- We closely control the manufacturing process to assure a steady, continuous and consistent supply shipment-to-shipment.
- You can count on unsurpassed personal service with an innovative and knowledgeable product support team.
- Pacific Albus is produced with the utmost care to the environment utilizing the principles of The Natural Step.
- We offer cost-efficient shipping with close proximity to truck, rail and barge.
- Can contribute to LEED credits.

Do the Right Thing

In 1993, The Collins Companies became the first privately-owned forest products company in the United States to be independently certified under the strict criteria of the Forest Stewardship Council (FSC). Today, all three of our hardwood and softwood forests are FSC-certified. In addition, we are now manufacturing and marketing FSC Pure Certified Collins Pacific Albus Plantation Hardwood lumber. In support of this effort toward conservation, we have also adopted the principles of The Natural Step, an international

environmental organization, into all of our manufacturing and office facilities. No greenwash. No Johnny-come-lately. Committed then when we were one of the first voices and committed now when we've been joined by a world of advocates. We invite you to help in protecting this Earth we all share by specifying Collins Pacific Albus Hardwood.

Multiple Applications

- Cants for reprocessing
- Landscape timbers
- Pallets/crating/boxes
- Recreation vehicle parts
- Veneer
- Pre-ripped moulding blanks
- S4S and cut stock
- Edge-glued panels
- Venetian blinds
- Furniture
- Pattern stock
- Millwork (solid & finger-joint)
- Picture frames
- Turned items, such as balusters
- Ceilings

Practical Advantages and Physical Properties

- Lightweight, straight grain, medium to fine texture, very light in color
- Takes and holds paint, stain, and enamel exceptionally well
- Ideal for machining, gluing, sanding, boring and turning
- Hypo-allergenic for use in saunas
- Edge-glues well; very stable due to very low radial/tangential shrinkage factor (1.16)
- Economical transportation by rail, barge and truck
- FSC "Pure" including mill residuals (chips, saw dust, bark)
- No issues with ports, lead times, exchange rates and ship fuel surcharges

Products

- Lumber: 4/4 and 5/4 thicknesses; lengths up to 13' (4 meters)
- Kiln-dried lumber is surfaced two sides with an abrasive planer
- Cants: Up to 6" x 8" x 13'
- S4S and millwork up to 8" wide
- Pallet shook
- Grades: WHPA, Industrials; NHLA West Coast, Select & Better, Commons and Frame grade
- Proprietary grades also available to meet exact needs
- Available kiln-dried, air-dried, heat treated or green

Hardwood/Softwood

- Collins Pacific Albus is a hardwood, but is a good alternative to many industrial, western softwood applications
- Good alternative to Alder, Aspen, and Basswood
